

Here's how it works: Each chapter has a series of definitions in Spanish. In the blanks beneath the clue, you need to correctly give the word that the definition is describing in English. Once you answer ALL of the definitions outlined in the chapter, you will be given a short clue as to what the answer is. You need to bring a letter from each answer to the Chapter page and unscramble the letters to solve the answer to this chapter. Repeat this exercise with all the chapters. Once you have accumulated all of the CORRECT chapter answers, you will be given the final clue. You need to then unscramble all of these letters from each chapter answer to solve the book. Each book has only one answer. Fortunately for you, every book has an answer key in the back if you should get completely stuck. The idea is to solve the book with as little help (cheating) from the answer key.
